(*II*) Super Missiles - Normal Missiles except you get 4 of them!

ON TRACK HELP/HAZARDS

PITSTOPS: Stop if your damage is critical, or else you die!

MINES: Detonate when driven over,don't.....!!!!

KILLZONES: Drive opposition into spikes for grizzly death!

JUMPS: Lose control but most often will avoid much worse

SPEED BUMPS: Spin out (see CD animation)

CANONS: Armour piercing? Watch out!

SHORTCUTS: Often fraught with danger but you could save some time...

ISLANDS: Just like the real thing, avoid or spill your drink....

LASER WALLS: Very very nasty...

RAM WALLS: Perfect for slamming your opponents into, usually quite handy

HINTS & TIPS

A common mistake playing Roadkill is to ignore the Pitstops. If your armour is low, a quick pitstop will enable your lightning fast crew of mech-droids to repair your machine. Risking death by racing with maximum damage is for the mentally impaired.

Want to get rich? Driving with an aggressive attitude is the only approach to earning big bucks. Break up with your girlfriend, leave your wallet in the arcade then start a brawl at the pub. Overloading the adrenaline glands before competing in Roadkill will help you earn jackpot after jackpot of filthy blood bucks.

Want to survive? Get out in front and stay there. Although opportunities for achieving maximum roadkills will be less you are more likely to finish alive.

Want to die a violent and painful death?

If yes then

Roadkill is your game.!!
